SUMMARY

Motivated and enthusiastic Computer Engineering graduate with a strong foundation in Full Stack Development, object-oriented programming, and database management. Recently completed PG-CP (Post Graduate Certification Program) from CDAC, gaining hands-on experience in Java, .NET, Python, SQL, web technologies, and software development. Passionate about building scalable applications, solving real-world problems, and continuously learning new technologies. Seeking an entry-level Software Engineer or Full Stack Developer role where I can contribute my technical skills and grow as a software professional.

EDUCATION

- MET Institute of Information Technology** Maharashtra, India
PGCP- Advance Computing; February 2026 - August 2026
- Sandip institute of Engineering and Management** Maharashtra, India
Bachelor of Engineering - Computer engineering; December 2021 - June 2025
- M.S.G College of Science, Commerce and Arts** Maharashtra, India
XII Science; June 2019 - March 2020
- L.V.H English Medium School** Maharashtra, India
X General; February 2018

SKILLS

- Languages:** DotNet, C++, SQL, JAVA, Python
- Web Technologies:** HTML, CSS, bootstrap
- Backend:** REST APIs, Hibernate, JDBC, Spring Boot, SpringFramework
- Tools:** VS code, Eclipse, Kaggle, Git, jenkins, Docker

PROJECTS

- Secure Voting System – Voting Application :**
Designed secure vote storage and verification workflows using Solidity, Ethereum, and Smart Contracts.
Implemented transparent data handling ensuring data integrity using Blockchain, Ethereum, and Solidity.
Built a user-friendly mobile application using Flutter and Dart that allowed voters to safely cast their votes through an intuitive interface.
- F2C (Farmer to Customer) – Direct Agricultural Marketplace :**
F2C (Farmer to Customer) Direct Agricultural Marketplace is a full-stack web application that connects farmers directly with customers, helping eliminate intermediaries and improve farmers' profitability.
The application was developed using Java, Spring Boot Microservices, React.js, MySQL, Spring Data JPA, REST APIs, and .NET Microservices. We followed a three-tier architecture to make the system scalable and maintainable.

CERTIFICATIONS

- Data Structures and Algorithms:** Career Credentials (April 2026)
Covered core Data Structures and Algorithms concepts, including improved syntax, performance enhancements, and the latest APIs.
- Python Essential Training:** linkedin learning (Aug 2024)
Developed a solid foundation in Python programming, covering data types, control flow, functions, and working with libraries.
- Java 11:** linkedin learning (Aug 2024)
This course covered core Java concepts, including new features in Java 11, such as improved syntax, performance enhancements, and the latest APIs, providing me with a strong foundation in modern Java development.
- Advanced Google Analytics:** Google Analytics (Aug 2024)
Learned advanced features like custom dimensions, custom metrics, enhanced ecommerce tracking, and advanced segmentation for deeper analytics insights.
